

Laboratory Work #9

Please write SQL queries for the following tasks and save them as a `lab9.sql` file.

1. Create the following tables:

Reviewer

reviewerID	name
301	Alex Johnson
302	Maria Gomez
303	John Doe
304	Linda Brown
305	Michael Thompson
306	Emily Davis
307	Daniel White
308	Sophia Lee

Review

reviewerID	movieID	rating	reviewDate
301	401	5	15/02/24
301	402	4	20/02/24
302	403	5	11/01/24
303	404	3	23/01/24
304	405	4	15/01/24
305	406	2	01/03/24
306	407	5	05/02/24
307	408	4	12/03/24

Movie

movieID	title	releaseYear	director
401	Future World	2024	Alice Smith
402	The Last Adventure	2024	John Black
403	New Horizons	2024	Maria Johnson
404	Time Capsule	2024	Chris Martin
405	Beyond the Stars	2024	null
406	The Silent Valley	2024	Laura Green
407	Lost in the Echo	2024	Daniel White
408	Shadow of Destiny	2024	James Clarke

2. Create a view that lists all unique release years of movies that received a rating of 4 or higher, sorted by year in ascending order.

3. Add indexes to improve the performance of queries that use the view created in the previous step.
4. Define a new role with privileges to log in and create additional roles.
5. Grant this new role all permissions that are typically available to a default user role.
6. Transfer ownership of all created tables from the root user to the new role.
7. Create a view that shows the titles of all movies reviewed in 2024 with a rating of 5, along with the reviewer's name. Sort the results alphabetically by the movie title.
